Professional Summary

Versatile Software Engineer with a strong foundation in Java development and exposure to both frontend and backend technologies. Proficient in Java, C#, HTML5, and CSS, with hands-on experience building scalable applications and web solutions. Adept at debugging, performance tuning, and delivering clean, maintainable code. Seeking to leverage technical expertise and problem-solving skills to contribute to innovative projects within dynamic development teams.

Work Experience

Rivetprop Management Services – Intern Software Developer

July 2025 – August 2025

Supervisor - Johan Jacobson (johan@rivetprop.co.za)

- Designed and implemented a secure authorization framework ensuring one-to-one user account mapping, strengthening data protection and eliminating account misuse.
 - Implemented and optimized a SQL Server stored procedure to automate duplicate elimination, improving data consistency and reducing manual cleanup efforts.
-

Projects

Car-Part Identification Mobile Application

- Built a mobile application to identify automotive parts from images, providing troubleshooting information and related data.
- Utilized Python for backend, Flutter for frontend, and PostgreSQL for database management.
- Collaborated with a team of six using GitHub for version control.

Hackathon Participation – Johannesburg

September 2023

- Developed a travel planning website estimating expenses and providing real-time weather forecasts via API integration.
 - Leveraged HTML, CSS, JavaScript, and Python for development.
 - Worked in a team of six students, completing the project within three days.
-

CORE SKILLS

- Programming
- Software development
- Web development
- Problem Solving

TECHNICAL SKILLS

- Java
 - Python
 - C++
 - C#
 - PHP
 - JavaScript
-

Education

Richfield Graduate Institution of Technology – Johannesburg

Bachelor of Science in Information Technology (81.67% average - December 2025)

Relevant Coursework: Software Development, Web Development, Database Management
